

## INDEX

### Key to the index:

Arabic numerals standing alone refer to the article numbers of the Convention itself. Articles of the annexes to the Convention are denoted by a capital "A" and a Roman numeral for the annex number, followed by the article number in Arabic numerals. "RI" and "RII" refer to the Final Act, Annex I, Resolutions I and II, of which the text is not reproduced in the reprint 2005 Edition. References to articles can be used in a similar manner as an access to the "Guide" (pages 21-99).

The word "Page" followed by a number refers to the page number of this book.

Finally, the word "example" in parentheses indicates that a large number of articles contain references to the key word and that the article numbers given are only exemplary.
